

INFRACO

Case Studies

Solving infrastructure's most challenging problems

Building on our strong track record

Highways Sector

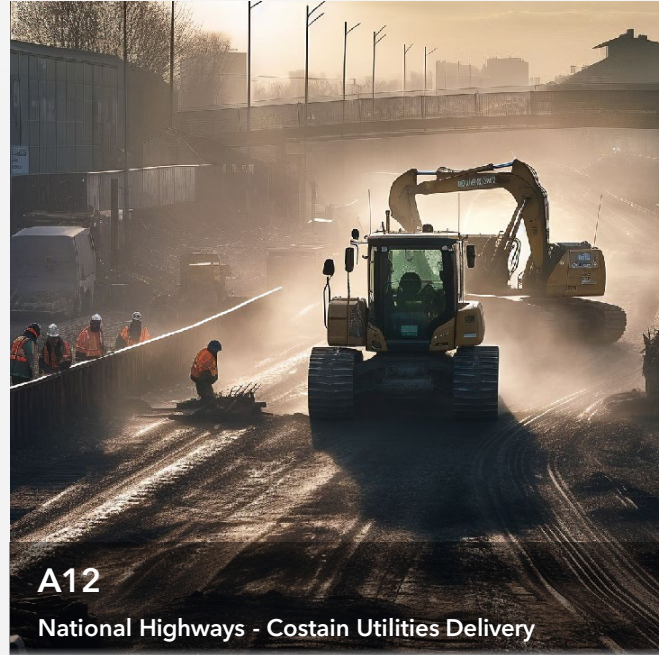

A303

National Highways - CMM JV OOA & Utilities

Consultant

INFRACO successfully assured, validated and implemented utilities and early works for this unique World Heritage infrastructure scheme.

A12

National Highways - Costain Utilities Delivery

Our A12 integrated utilities team managed the design and commercial interfaces to achieve significant savings in time and cost for the project.

Lower Thames Crossing

Integration Partner - Cascade Utilities Consultant

Across the project, INFRACO managed multiple stakeholders to deliver the utility strategy, design coordination and commercial elements.

Enabling Projects

Energy Sector

Sizewell C

Client Utilities Team - EDF

Embedded with the Client our INFRACO team of specialist consultants are working to deliver the strategy and manage and coordinate the utilities, project-wide.

Geothermal UK

Utilities Specialist Consultants - GEL

Our INFRACO team are engaged in the UK's first Geothermal power site, undertaking the specialist connections and export utilities management for this unique project.

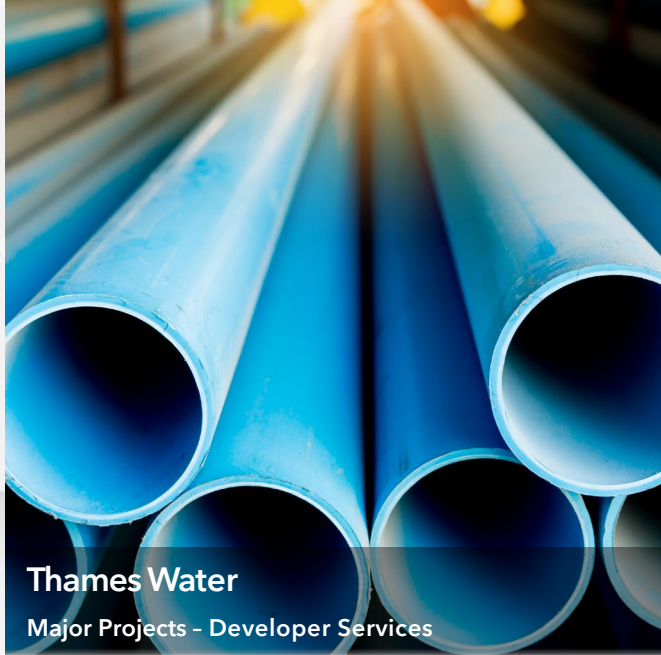

National Grid Ventures

Commercial Delivery Support - Special Projects

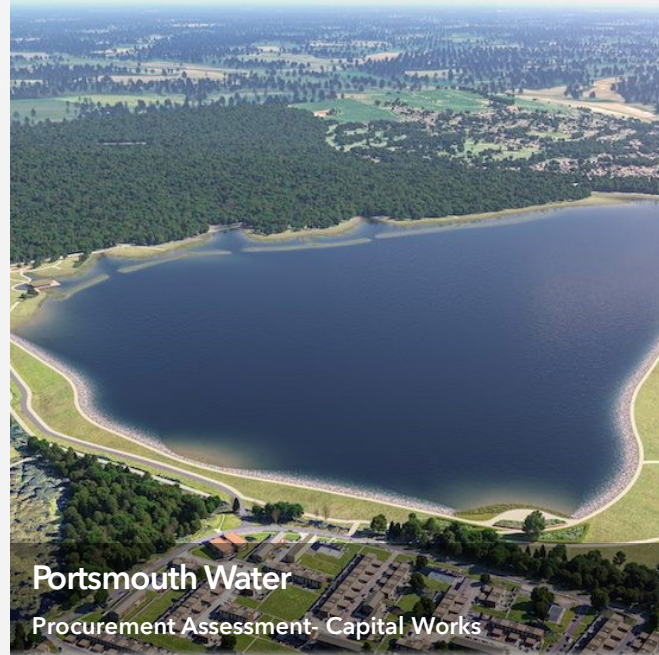

INFRACO were responsible for providing challenges expertise to assess and control the costs and ensure VfM on this complex, critical interconnector project.

Empowering Infrastructure

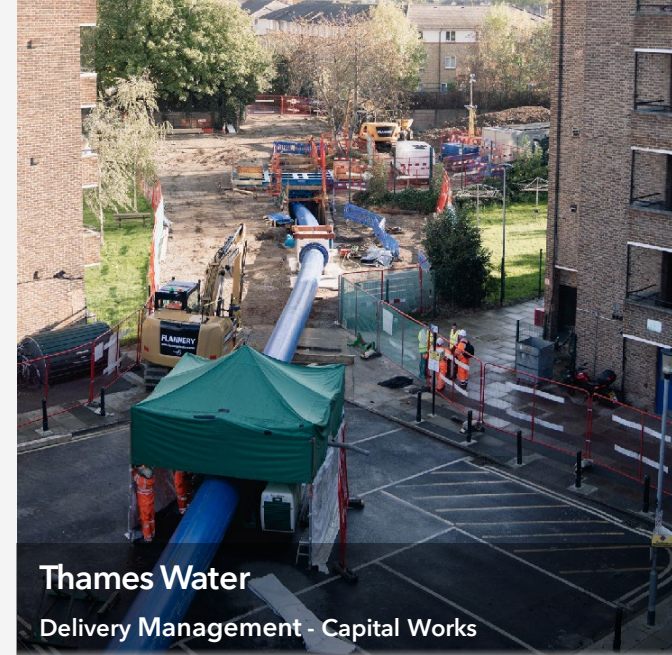

Water Sector

Our INFRACO delivery experienced team were embedded to coordinate and manage the significant programme of major projects across the Thames Water region

INFRACO were engaged to assist with the pre-construction elements of this significant project. Undertaking analysis and tendering reviews before start of works

For Thames Water, INFRACO seamlessly managed and delivered significant and critical infrastructure in central London. Keeping the water flowing.

Facilitating the future

Rail Sector

At HS2, our INFRACO integrated team worked with the Contractor EKFB to manage design delivery and ensured coordination with all engineering disciplines facilitating a clear route to delivery

INFRACO were engaged with EWR to develop the strategies and implementation plans for both the Early Works and Utilities diversions across the scheme.

At HS2, our INFRACO team have proactively integrated and managed the utility designs with the stakeholders, to keep this priority project on track.

What our clients say...

"I admire their ability to tackle issues head-on. If ever they came to me with a problem, it was always accompanied by a solution."

Head of Tideway Integration Group, Tideway

"They always dealt with the situations with nothing less than calm. Always ready for a challenge, ever professional, reliable and logical, with a sense of optimism."

Commercial Lead SPN, UK Power Networks

"They have strength and depth throughout the business and have some of the best individuals in the industry. They have found the niche in the market with the experience and record to back it up."

Senior Director Construction UNCE EMEA - Worley Parsons
